Hydrobiologia

The International Journal of Aquatic Sciences

Volume 549, 15 October 2005

Primary Research Papers

Phytoplankton assemblages and their dominant pigments in the Nervion River estuary
S. Seoane, A. Laza, I. Urrutxurtu, E. Orive 1–13

Phoretic behaviour of bromeliad annelids (*Dero*) and ostracods (*Elpidium*) using frogs and lizards as dispersal vectors
L.C.S. Lopez, B. Filizola, I. Deiss, R.I. Rios 15–22

On the importance of water depth, macrophytes and fish in wetland picocyanobacteria regulation
D.G. Angeler, S. Sánchez-Carrillo, M.A. Rodrigo, O. Viedma, M. Alvarez-Cobelas 23–32

Remarkable salinity tolerance of seven species of naked amoebae (gymnamoebae)
G. Hauer, A. Rogerson 33–42

Impact of macrozoobenthos on two-dimensional small-scale heterogeneity of pore water phosphorus concentrations: *in-situ* study in Lake Arendsee (Germany)
J. Lewandowski, M. Schadach, M. Hupfer 43–55

Testing for the effects of seasonal and lunar periodicity on the reproduction of the edible sea urchin *Tripneustes gratilla* (L) in Kenyan coral reef lagoons
N.A. Muthiga 57–64

An approach to assessing hydrological influences on feeding opportunities of juvenile Atlantic salmon (*Salmo salar*): a case study of two contrasting years in a small, nursery stream
D. Tetzlaff, C. Soulsby, C. Gibbins, P.J. Bacon, A.F. Youngson 65–77

Respiration rate of stream insects measured *in situ* along a large altitude range
S. Rostgaard, D. Jacobsen 79–98

The effect of fish introductions on the diatom and cladoceran communities of Lake Opeongo, Ontario, Canada
J.-M. St. Jacques, M.S.V. Douglas, N. Price, N. Drakulic, C.P. Gubala 99–113

First year ontogenetic diet patterns in two coexisting *Sander* species, *S. lucioperca* and *S. volgensis* in Lake Balaton
A. Specziár 115–130

Distribution of Chironomidae (Insecta: Diptera) head capsules in recent sediments of Canadian Arctic lakes
K. Gajewski, G. Bouchard, S.E. Wilson, J. Kurek, L.C. Cwynar 131–143

Changes in coral reef communities and an associated reef fish species, *Cephalopholis cruentata* (Lacépède), after 30 years on Curaçao (Netherlands Antilles)
I. Nagelkerken, K. Vermonden, O.C.C. Moraes, A.O. Debrot, W.P. Nagelkerken 145–154

Foraging of a small planktivore (*Pseudorasbora parva:* Cyprinidae) and its behavioral flexibility in an artificial stream
Sunardi, T. Asaeda, J. Manatunge 155–166

Dynamics of fine particulate organic matter (FPOM) and macroinvertebrates in natural and artificial leaf packs
A. Hoffmann 167–178

Effect of permanent shading on adult size and biomass of the caddisfly *Lype phaeopa* (Stephens, 1836) (Psychomyiidae)
B. Spänhoff 179–186

Competitive interactions between the Australian native fish *Galaxias maculatus* and the exotic mosquitofish *Gambusia holbrooki*, in a series of laboratory experiments
A. Becker, L.J.B. Laurenson, P.L. Jones, D.M. Newman 187–196

The role of salinity in structuring fish assemblages in a prairie stream system
C.L. Higgins, G.R. Wilde 197–203

Effects of deposited sediment on patch selection by two grazing stream invertebrates
A.M. Suren 205–218

Role of life history strategy in the colonisation of Western Australian aquatic systems by the introduced crayfish *Cherax destructor* Clark, 1936
S. Beatty, D. Morgan, H. Gill 219–237

Morphological differentiation between geographically separated populations of *Neomysis integer* and *Mesopodopsis slabberi* (Crustacea, Mysida)
T. Remerie, T. Bourgois, A. Vanreusel 239–250

Food and feeding habits of flounder *Paralichthys orbignyanus* (Jenyns, 1842) in Bahía Blanca Estuary, Argentina
A.L. Cazorla, S. Forte 251–257

Direct and indirect effects of solar ultraviolet radiation on attached bacteria and algae in lotic systems
Y. Hodoki 259–266

Long-term changes in the invertebrates associated with the litter of *Phragmites australis* in a managed reedbed
A.P. Bedford, I. Powell 267–285

Fluctuating selection, egg banks and population genetic structure in cyclically parthenogenetic species
L.M. Berg 287–295

Short Research Note

Relative uptake of urea and ammonium by dinoflagellates or cyanobacteria in shrimp mesocosms
M.A. Burford 297–303
